

List of Appendix Tables

Chapter 2. Higher Education in Science and Engineering

2-1	Population of 20- to 24-year-olds in selected countries and regions: 1975–2010	A2-1
2-2	U.S. population of 18- to 24-year-olds, by race/ethnicity: 1980–2025	A2-2
2-3	Enrollment in higher education, by Carnegie institution type: 1967–97	A2-3
2-4	Institutions awarding S&E degrees, by institution type and degree level: 1998	A2-4
2-5	S&E degrees, by institution type and degree level: 1998	A2-5
2-6	Postsecondary faculty in S&E, by field, race/ethnicity, and employment status: 1999	A2-6
2-7	Enrollment rates of high school graduates in higher education, by race/ethnicity: 1975–99	A2-7
2-8	Undergraduate enrollment, by race/ethnicity, citizenship, and sex: 1978–97 (selected years)	A2-8
2-9	Undergraduate enrollment in engineering and engineering technology programs: 1979–99 (selected years)	A2-9
2-10	Engineering enrollment, by level and attendance: 1979–99	A2-10
2-11	Freshmen intending to major in S&E, by race/ethnicity, field, and sex: 1975–2000	A2-11
2-12	Freshmen intending to major in selected S&E fields, by race/ethnicity: 1971–2000	A2-14
2-13	Freshmen reporting need for remedial work in science or mathematics, by intended major: 2000	A2-15
2-14	Earned associate's degrees, by field and sex: 1975–98 (selected years)	A2-16
2-15	Earned associate's degrees, by field and race/ethnicity: 1977–98 (selected years)	A2-17
2-16	Earned bachelor's degrees, by field and sex: 1975–98 (selected years)	A2-20
2-17	Earned bachelor's degrees, by field, race/ethnicity, and citizenship: 1977–98 (selected years)	A2-22
2-18	Ratio of first university degrees and science and engineering degrees to 24-year-old population in selected locations, by region: 1999 or most recent year	A2-25
2-19	Graduate enrollment in S&E, by field and sex: 1975–99 (selected years)	A2-28
2-20	Graduate enrollment in S&E, by field, race/ethnicity, and citizenship: 1983–99	A2-29
2-21	Enrollment of foreign graduate students in U.S. universities for top 10 locations of origin, by field and academic year: 1987/88 to 1999/2000	A2-31
2-22	Earned master's degrees, by field and sex: 1977–98 (selected years)	A2-33
2-23	Earned master's degree, by field, race/ethnicity, and citizenship: 1977–98 (selected years)	A2-35
2-24	Earned doctoral degrees, by field and sex: 1970–99 (selected years)	A2-39
2-25	Earned doctoral degrees, by field, race/ethnicity, and citizenship: 1977–99 (selected years)	A2-41
2-26	Earned doctoral degrees, by field and citizenship: 1986–99	A2-43
2-27	Full-time S&E graduate students, by source and mechanism of primary support: 1980–99	A2-44
2-28	Full-time S&E graduate students, by field and mechanism of primary support: 1999	A2-46
2-29	Full-time S&E graduate students whose primary source of support is the Federal Government, by field and mechanism of primary support: 1999	A2-47
2-30	Full-time S&E graduate students with primary support from Federal Government, by Federal agency: 1980–99	A2-48
2-31	Primary mechanisms of support for S&E Ph.D. recipients, by citizenship, sex and race/ethnicity: 1999	A2-49
2-32	Foreign doctoral recipients from U.S. universities who plan to stay in United States, by field and location of origin: 1990–99	A2-50
2-33	Bachelor's S&E degrees in the United States and Asia, by field: 1975–98 (selected years)	A2-65
2-34	First university degrees and ratio of first university degrees and S&E degrees to 24-year-old population, in selected regions and locations, by sex: 1999 or most recent year	A2-66

2-35	Enrollment of foreign students in U.K. universities, by level, field, and 10 top countries of origin: 1995 and 1999	A2-68
2-36	Enrollment of foreign S&E students at French universities, by level, field, and country of origin: 1999	A2-69
2-37	Enrollment of foreign students at Japanese universities, by degree level, field, and country of origin: 1999	A2-70
2-38	Foreign graduate student enrollment in S&E fields, by country and field: 1998 or 1999	A2-71
2-39	Doctoral S&E degrees in selected Asian countries and economies, by field: 1975–99	A2-72
2-40	Doctoral S&E degrees in selected industrialized countries, by field: 1975–99	A2-73
2-41	Doctoral S&E degrees earned by Asian students at their place of origin and at U.S. universities: 1975–99	A2-74
2-42	Earned S&E doctoral degrees in selected regions and locations: 1999 or latest available year	A2-75
2-43	Earned S&E doctoral degrees in selected regions and locations, by sex and field: 1999 or most recent year	A2-77
2-44	Doctoral S&E degrees earned by foreign students in the United Kingdom, by field and top 10 locations of origin: 1995 and 1999	A2-79
2-45	Doctoral S&E degrees earned by foreign students in selected industrialized countries: 1998 or 1999	A2-80

Chapter 3. Science and Engineering Workforce

3-1	SESTAT degree field and occupational category	A3-1
3-2	U.S. scientists and engineers, by S&E degree and labor force status: 1999	A3-6
3-3	U.S. scientists and engineers, by S&E degree and labor force status: 1997	A3-7
3-4	U.S. scientists and engineers, by S&E degree and labor force status: 1995	A3-8
3-5	U.S. scientists and engineers, by S&E degree status and labor force status: 1993	A3-9
3-6	Occupational distribution of employed U.S. scientists and engineers, by level and field of highest degree: 1999	A3-10
3-7	Occupational distribution of employed U.S. scientists and engineers, by level and field of highest degree: 1993	A3-14
3-8	Employed individuals with S&E highest degrees whose jobs are closely related to field of highest degree by degree level and years since degree: 1999	A3-18
3-9	Employed individuals with S&E highest degrees whose jobs are closely or somewhat related to field of highest degree by degree level and years since degree: 1999	A3-22
3-10	Individuals with S&E occupations, by highest degree attained, occupation, and employment status: 1999	A3-26
3-11	Individuals with S&E occupations, by highest degree attained, occupation, and employment status: 1993	A3-30
3-12	Employed individuals in S&E occupations, by highest degree attained, occupation, and employment sector: 1999	A3-34
3-13	Employed individuals with S&E highest degree, by highest degree attained, field of highest degree, and employment sector: 1999	A3-38
3-14	Individuals employed in S&E occupations, by highest degree attained, broad occupation category, and employment sector: 1999	A3-42
3-15	Individuals employed in S&E occupations, by highest degree attained, broad occupation category, and employment sector: 1997	A3-43
3-16	Individuals employed in S&E occupations, by highest degree attained, broad occupation category, and employment sector: 1995	A3-44
3-17	Individuals employed in S&E occupations, by highest degree attained, broad occupation category, and employment sector: 1993	A3-45
3-18	Individuals with S&E highest degrees, by highest degree attained, broad field of highest degree, and employment sector: 1999	A3-46
3-19	Individuals with S&E highest degrees, by highest degree attained, broad field of highest degree, and employment sector: 1997	A3-47

3-20	Individuals with S&E highest degrees, by highest degree attained, broad field of highest degree, and employment sector: 1995	A3-48
3-21	Employed individuals with S&E highest degrees, by highest degree attained, broad field of highest degree, and employment sector: 1993	A3-49
3-22	Median annual salaries of U.S. individuals in S&E occupations, by occupation and highest degree attained: 1999	A3-50
3-23	Median annual salaries of U.S. individuals in S&E occupations, by occupation and highest degree attained: 1997	A3-51
3-24	Median annual salaries of U.S. individuals in S&E occupations, by occupation and highest degree attained: 1995	A3-52
3-25	Median annual salaries of U.S. individuals in S&E occupations, by occupation and highest degree attained: 1993	A3-53
3-26	Median annual salaries of U.S. individuals in S&E occupations by highest degree attained, occupation, sex, race/ethnicity, and years since highest degree: 1999	A3-54
3-27	Median annual salaries of U.S. individuals in S&E occupations, by highest degree attained, occupation, sex, race/ethnicity, and years since highest degree: 1997	A3-60
3-28	Median annual salaries of individuals in S&E occupations, by highest degree attained, occupation, sex, race/ethnicity, and years since highest degree: 1995	A3-66
3-29	Median annual salaries of U.S. individuals employed in S&E occupations, by highest degree attained, occupation, sex, race/ethnicity, and years since highest degree: 1993	A3-72
3-30	Median annual salaries of individuals with S&E highest degrees, by highest degree attained, field of highest degree, sex, race/ethnicity, and years since highest degree: 1999	A3-78
3-31	Median annual salaries of individuals with S&E highest degrees, by highest degree attained, field of highest degree, sex, race/ethnicity, and years since highest degree: 1997	A3-84
3-32	Median annual salaries of U.S. individuals with S&E highest degrees, by highest degree attained, field of highest degree, sex, race/ethnicity, and years since highest degree: 1995	A3-90
3-33	Median annual salaries of U.S. individuals with S&E highest degrees, by highest degree attained, field of highest degree, sex, race/ethnicity, and years since highest degree: 1993	A3-96
3-34	Individuals in labor force in S&E occupations by highest degree attained, occupation, sex, race/ethnicity, and age: 1999	A3-102
3-35	Individuals in labor force in S&E occupations by highest degree attained, occupation, sex, race/ethnicity, and age: 1993	A3-108
3-36	Individuals in labor force with S&E highest degrees, by highest degree attained, field of highest degree, sex, race/ethnicity, and age: 1999	A3-114
3-37	Individuals in labor force with S&E highest degrees, by highest degree attained, field of highest degree, sex, race/ethnicity, and age: 1993	A3-120
3-38	Individuals in S&E occupations, by highest degree attained, occupation, sex, race/ethnicity, and employment status: 1999	A3-126
3-39	Individuals in S&E occupations, by highest degree attained, occupation, sex, race/ethnicity, and employment status: 1993	A3-132
3-40	Individuals employed in S&E occupations, by highest degree attained, occupation, sex, race/ethnicity, and employment sector: 1999	A3-138
3-41	Employed U.S. scientists and engineers, by highest degree attained, occupation, sex, and race/ethnicity: 1999	A3-144
3-42	Employed U.S. scientists and engineers, by highest degree attained, occupation, sex, and race/ethnicity: 1997	A3-145
3-43	Individuals employed in S&E occupations by highest degree attained, occupation, sex, and race/ethnicity: 1995	A3-146

3-44	Individuals employed in S&E occupations by highest degree attained, occupation, sex, and race/ethnicity: 1993	A3-147
3-45	Number, employment status, and median salary of 1997 and 1998 bachelor's and master's degree recipients, by field of degree: 1999	A3-148
3-46	Median annual salaries of individuals in S&E occupations, by highest degree attained, occupation, sex, race/ethnicity, and employment sector: 1999	A3-150
3-47	Median annual salaries of individuals employed in S&E occupations, by highest degree attained, occupation, sex, race/ethnicity, and employment sector: 1993	A3-154
3-48	Individuals in the labor force with S&E highest degrees, by degree level, tenure status at four-year educational institutions, field of highest degree, and age: 1999	A3-158
3-49	Individuals in the labor force with any S&E degrees, by degree level, tenure status at four-year educational institutions, occupation, and age: 1999	A3-163
3-50	Older S&E-degreed individuals working full time: 1999	A3-168
3-51	Foreign-born U.S. residents with S&E highest degrees, by place of birth: 1999	A3-169
3-52	Number of foreign-born U.S. residents with S&E doctorates, by place of birth: 1999	A3-170
3-53	Total science and engineering jobs: 2000 and projected 2010	A3-171

Chapter 4. U.S. and International Research and Development: Funds and Alliances

4-1	GDP and GDP implicit price deflators: 1953–2003	A4-1
4-2	Purchasing power parity and market exchange rates, by selected country: 1981–2000	A4-2
4-3	U.S. R&D expenditures, by performing sector and source of funds: 1953–2000	A4-3
4-4	U.S. inflation-adjusted R&D expenditures, by performing sector and source of funds: 1953–2000	A4-5
4-5	U.S. R&D expenditures, by source of funds and performer: 1953–2000	A4-7
4-6	U.S. inflation-adjusted R&D expenditures, by source of funds and performer: 1953–2000	A4-9
4-7	U.S. basic research expenditures, by performing sector and source of funds: 1953–2000	A4-11
4-8	U.S. inflation-adjusted basic research expenditures, by performing sector and source of funds: 1953–2000	A4-13
4-9	U.S. basic research expenditures, by source of funds and performer: 1953–2000	A4-15
4-10	U.S. inflation-adjusted basic research expenditures, by source of funds and performer: 1953–2000	A4-17
4-11	U.S. applied research expenditures, by performing sector and source of funds: 1953–2000	A4-19
4-12	U.S. inflation-adjusted applied research expenditures, by performing sector and source of funds: 1953–2000 ...	A4-21
4-13	U.S. applied research expenditures, by source of funds and performer: 1953–2000	A4-23
4-14	U.S. inflation-adjusted applied research expenditures, by source of funds and performer: 1953–2000	A4-25
4-15	U.S. development expenditures, by performing sector and source of funds: 1953–2000	A4-27
4-16	U.S. inflation-adjusted development expenditures, by performing sector and source of funds: 1953–2000	A4-29
4-17	U.S. development expenditures, by source of funds and performer: 1953–2000	A4-31
4-18	U.S. inflation-adjusted development expenditures, by source of funds and performer: 1953–2000	A4-33
4-19	Trends in Federal and non-Federal R&D expenditure shares: 1953–2000	A4-35
4-20	Federal basic research budget authority, by budget function: fiscal years 1995–2001	A4-36
4-21	R&D expenditures by state, performing sector, and source of funds: 1999	A4-37
4-22	R&D expenditures by state, performing sector, and sources of funds: 1987–98	A4-39
4-23	Total R&D and gross state product, by state: 1999	A4-50
4-24	Trends in R&D and Federal outlays: fiscal years 1970, 1980, 1990, 2000, and 2002	A4-51
4-25	Estimated Federal obligations for R&D and R&D plant, by selected agency, performer, and character of work: fiscal year 2001	A4-52
4-26	Federal R&D budget authority, by budget function: fiscal years 1980–2001	A4-54
4-27	Estimated Federal obligations for research, by agency and field of science and engineering: fiscal year 2001 ...	A4-56
4-28	R&D associated primarily with chemistry (nonmedical) and chemical engineering: 1985–98	A4-57
4-29	R&D associated primarily with the life sciences: 1985–1998	A4-58

4-30	Budgetary impact of Federal research and experimentation tax credit: fiscal years 1981–2000	A4-59
4-31	Total expenditures for industrial R&D (financed by company, Federal, and other sources), by industry and size of company: 1997–99	A4-60
4-32	Company and other non-Federal funds for U.S. industrial R&D performance, by industry and size of company: 1997–99	A4-62
4-33	Federal funds for industrial R&D performance, by industry and size of company: 1997–99	A4-64
4-34	Discrepancy between Federal R&D support as reported by performers and Federal agencies: 1980–2000	A4-66
4-35	Indicators of Federal technology transfer activities, by Federal agency: fiscal years 1987–2000	A4-67
4-36	Small Business Innovation Research awards, by award type and agency: fiscal years 1983–99	A4-70
4-37	Small Business Technology Transfer Program awards, by award type and agency: fiscal years 1994–99	A4-71
4-38	Advanced Technology Program awards, number of participants, and funding: fiscal years 1990–2000	A4-72
4-39	International strategic technology alliances, by technology and selected region/country: 1980–2000	A4-73
4-40	International R&D expenditures and R&D as percentage of GDP, by selected country and for all OECD countries: 1981–99	A4-77
4-41	International nondefense R&D expenditures and nondefense R&D as a percentage of GDP by selected country: 1981–99	A4-79
4-42	International R&D expenditures for G-8 countries, by performing sector and source of funds: 1998 or 1999	A4-80
4-43	Distribution of government R&D budget appropriations in G-8 countries, by socioeconomic objective: 1998 or 1999	A4-81
4-44	Sources of total and industry R&D expenditures, for all OECD countries combined: 1981–98	A4-82
4-45	Proportion of industry R&D expenditures financed from foreign sources, by selected country or region: 1981–99	A4-83
4-46	Industrial R&D performed abroad by foreign affiliates of U.S. parent companies: 1985–99	A4-84
4-47	Industrial R&D performed abroad by foreign affiliates of U.S. parent companies, by NAICS industrial classification: 1997–99	A4-85
4-48	R&D performed abroad by majority-owned foreign affiliates of U.S. parent companies, by region and country: 1982, 1989, and 1994–98	A4-87
4-49	R&D performed by U.S. affiliates of foreign companies in the United States, by region and country of ultimate beneficial owner: 1980–98	A4-88
4-50	R&D performed by majority-owned U.S. affiliates of foreign companies in the United States, by region/country of ultimate beneficial owner: 1980 and 1987–98	A4-89
4-51	R&D performed by majority-owned U.S. affiliates of foreign companies in the United States, by NAICS industry of affiliate: 1997 and 1998	A4-90
4-52	Industrial R&D expenditure flows and industrial globalization R&D (IGRD) index, by sector and selected industries: 1998	A4-92

Chapter 5. Academic Research and Development

5-1	Total, federally funded, and nonfederally funded academic R&D, by basic research, applied research, and development: 1953–2000	A5-1
5-2	Support for academic R&D, by sector: 1953–2000	A5-2
5-3	Sources of R&D funds at private and public institutions: 1979, 1989, and 1999	A5-5
5-4	R&D expenditures at the top 100 academic institutions, by source of funds: 1999	A5-6
5-5	Expenditure allocation among instruction, research, and public service at academic institutions, by type of control: 1977–96	A5-9
5-6	Expenditure allocation among instruction, research, and public service at academic institutions, by type of control and selected Carnegie classification: 1977–96	A5-11
5-7	Total, Federal, and non-Federal R&D expenditures at academic institutions, by field and source of funds: 1999	A5-13

5-8	Percentage of academic R&D funds provided by the Federal Government, by field: 1973–99	A5-14
5-9	Expenditures for academic R&D, by field: 1973–99	A5-15
5-10	Federal obligations for academic R&D, by agency: 1970–2001	A5-18
5-11	Federal obligations for academic research, by agency: 1970–2001	A5-20
5-12	Distribution of Federal agency academic research obligations, by field: FY 1999	A5-22
5-13	Federal academic research obligations provided by major agencies, by field: FY 1999	A5-23
5-14	Number of academic institutions receiving Federal R&D support, by selected Carnegie classification: 1971–99	A5-24
5-15	Academic research space, new construction, and repaired/renovated space, by field: 1986–2001	A5-25
5-16	Cost of new construction and repair/renovation of academic research facilities, by field: 1986–2001	A5-26
5-17	Funds for new construction and repair/renovation of S&E research space, by type of institution and funding source: 1986–99	A5-27
5-18	Percentage of funds for new construction and repair/renovation of S&E research space, by type of institution and funding source: 1986–99	A5-29
5-19	Expected costs of deferred S&E research facility construction and repair/renovation needs, by field: 1999	A5-31
5-20	Current fund expenditures for research equipment at academic institutions, by field: 1983–99	A5-32
5-21	Current funds provided by Federal Government for research equipment at academic institutions, by field: 1983–99	A5-35
5-22	Expenditures of current funds for research equipment at academic institutions as a percentage of total academic R&D expenditures, by field: 1983–99	A5-36
5-23	Doctoral scientists and engineers in research universities and other academic institutions, by type of appointment and primary work activity: 1973–99	A5-37
5-24	U.S. and foreign-born doctoral scientists and engineers with U.S. doctorates at academic institutions, by type of position and field of degree: 1973–99	A5-38
5-25	Doctoral academic scientists and engineers, by type of position and Carnegie classification and administrative control of institution: 1973–99	A5-43
5-26	Academic employment of doctoral scientists and engineers, by type of position and field of degree: 1973–99	A5-48
5-27	Recent S&E Ph.D.s employed in academia by years since doctorate, type institution, appointment, and tenure status: 1973–99	A5-50
5-28	Age distribution of academic doctoral scientists and engineers, by type of appointment: 1973–99	A5-52
5-29	Age distribution of doctoral scientists and engineers in full-time faculty positions at research universities and other academic institutions: 1973–99	A5-53
5-30	Doctoral scientists and engineers employed in academia, by degree field, sex, and type of position: 1973–99 ..	A5-54
5-31	Academic employment of doctoral scientists and engineers, by degree field, race/ethnicity, and type of position: 1973–99	A5-58
5-32	Academic doctoral scientists and engineers, by primary work activity: 1973–99	A5-64
5-33	Academic doctoral scientists and engineers whose primary or secondary work activity is teaching or research: 1973–99	A5-67
5-34	Estimates of number of academic doctoral researchers and graduate research assistants, by field of degree or study: 1973–99	A5-68
5-35	Estimates of total academic employment, doctoral researchers and graduate research assistants, by Carnegie institution type: 1973–99	A5-69
5-36	Estimates of academic doctoral researchers by type of position	A5-71
5-37	Estimates of academic doctoral researchers and graduate research assistants by field: 1973–99	A5-72
5-38	Academic doctoral scientists and engineers with Federal support, by field of degree: 1973–99	A5-75
5-39	Recent doctorate holders in academia with Federal support, by field: 1973–99	A5-76
5-40	Broad and fine fields for publications output data	A5-81
5-41	Number of scientific publications by region and country: 1986–99	A5-82
5-42	Per capita output of scientific articles: 1998	A5-87

5-43	Regional and country portfolio of scientific articles, by field: 1999 and 1986	A5-89
5-44	Distribution of U.S. scientific and technical articles, by sector and field: 1988, 1994, and 1999	A5-99
5-45	Incidence of multiple corporate authorship of U.S. scientific and technical articles, by field: 1988, 1994, and 1999	A5-100
5-46	Patterns of cross-sectoral coauthorship of U.S. scientific and technical articles, by sector and field: 1988 and 1999	A5-104
5-47	Breadth of international coauthorship ties for selected countries: 1986 and 1999	A5-112
5-48	U.S. international scientific collaboration: 1986 and 1999	A5-113
5-49	Intraregional scientific collaboration in selected regions: 1986 and 1999	A5-117
5-50	Citations by world's scientific papers to scientific literature, by region and country/economy: 1990, 1994, and 1999	A5-120
5-51	Relative prominence of scientific and technical literature, by region: 1990–99	A5-124
5-52	Relative prominence of scientific literature by country/economy and field: 1990, 1994, and 1999	A5-126
5-53	Citations of foreign literature by country and region	A5-130
5-54	U.S. patent citations to scientific literature, by field and by country/region: 1987–2000	A5-131
5-55	Citations of U.S. patents to U.S. literature, by field and sector: 1987, 1990, 1994, and 2000	A5-132
5-56	U.S. patents awarded to all U.S. universities and colleges and to top 100 patenting institutions in 1990s: 1982–98	A5-134

Chapter 6. Industry, Technology, and the Global Marketplace

6-1	World industry and trade data for selected countries or economies and industries: 1980–98	A6-1
6-2	Production by five knowledge-intensive service industries, for selected countries or economies: 1980–98	A6-17
6-3	U.S. trade balance for advanced technology products: 1990–99	A6-21
6-4	U.S. trade exports of advanced technology products: 1990–99	A6-30
6-5	U.S. trade imports of advanced technology products: 1990–99	A6-39
6-6	U.S. receipts and payments of royalties and fees associated with affiliated and unaffiliated foreign residents: 1987–99	A6-48
6-7	U.S. receipts and payments of royalties and license fees generated from exchange and use of industrial processes with unaffiliated foreign residents, by region or country/economy: 1987–99	A6-49
6-8	Leading indicators of technological competitiveness: 1999	A6-51
6-9	United States industrial R&D performance: 1987–97	A6-52
6-10	Japan industrial R&D performance: 1987–97	A6-54
6-11	European Union industrial R&D performance: 1992–1997	A6-55
6-12	U.S. patents granted, by residence of inventor/type of ownership: Pre-1986 and 1986–99	A6-56
6-13	Number of U.S. patent applications: 1989–99	A6-57
6-14	Patents granted in selected countries, by inventor residence	A6-58
6-15	Human DNA sequence patents: Number of international patent families, by priority country and priority year	A6-60
6-16	Human DNA sequence patents: Number of active assignees (not including individual inventors), by priority country and priority year: 1980–99	A6-61
6-17	Internet-related business methods patents: Number of international patent families by priority country and priority year: 1995–2000	A6-62
6-18	Internet-related business methods patents: Number of active assignees (not including individual inventors) by priority country and priority year: 1995–2000	A6-63
6-19	U.S. venture capital disbursements, by industry category: 1980–2000	A6-64
6-20	U.S. venture capital disbursements, by stage of financing: 1980–2000	A6-65
6-21	U.S. venture capital disbursements as seed money, by industry category: 1980–2000	A6-66

Chapter 7. Science and Technology: Public Attitudes and Public Understanding

7-1	Level of public interest in selected policy issues: 1979–2001	A7-1
7-2	Level of public interest in selected policy issues: 1979–2001	A7-2
7-3	Level of public interest in selected policy issues, by sex and level of education: 2001	A7-3
7-4	Feeling informed about selected policy issues: 1979–2001 (selected years)	A7-4
7-5	Feeling informed about selected policy issues: 1979–2001	A7-5
7-6	Feeling informed about selected policy issues, by sex and level of education: 2001	A7-6
7-7	Public attentiveness to selected policy issues: 1979–2001	A7-7
7-8	Public attentiveness to science and technology issues, by sex and level of education: 2001	A7-8
7-9	Correct answers to scientific terms and concept questions: 1995–2001	A7-9
7-10	Correct answers to specific science literacy questions: 2001	A7-10
7-11	Public understanding of the nature of scientific inquiry: 2001	A7-12
7-12	Attitudes toward science and technology items included in the Index of Scientific Promise and the Index of Scientific Reservation: 2001	A7-13
7-13	Results of Attitude Toward Organized Science Scale: 1983–2001	A7-14
7-14	Belief that people would do better by living a simpler life: 1997, 1999, and 2001	A7-15
7-15	Belief that technological discoveries will destroy the Earth: 1997, 1999, and 2001	A7-16
7-16	Public assessment that technological development creates an artificial and inhuman way of living: 1997, 1999, and 2001	A7-17
7-17	General attitudes toward science and technology: 1999 and 2001	A7-18
7-18	Public assessment of general scientific research: 1979–2001	A7-19
7-19	Public assessment of funding of scientific research by the Federal Government: 1985–2001	A7-21
7-20	Support for Federal funding of basic scientific research, by level of Index of Scientific Promise, Index of Scientific Reservation, and by education: 2001	A7-22
7-21	Public preferences for level of Federal Government spending on selected policy issues: 1981–2001	A7-23
7-22	Public preferences for level of Federal Government spending: 2001	A7-24
7-23	Public assessment of genetic engineering: 1985–2001	A7-25
7-24	Public assessment of selected biotechnology applications: 2001	A7-27
7-25	Public assessment of space exploration: 1985–2001	A7-28
7-26	Public assessment of use of mice in scientific research: 2001	A7-30
7-27	Public assessment of use of dogs and chimpanzees in scientific research: 1988–2001	A7-31
7-28	Public belief in global warming: 2001	A7-33
7-29	Public assessment of global warming: 2001	A7-34
7-30	Public assessment of the quality of science and mathematics education in the United States: 1985–2001	A7-35
7-31	Public confidence in leadership of various institutions: 1973–2000	A7-36
7-32	Response to statement, “Scientists are helping to solve challenging problems”: 2001	A7-37
7-33	Response to statement, “Scientific researchers are dedicated people who work for the good of humanity”: 2001	A7-38
7-34	Response to statement, “A scientist usually works alone”: 2001	A7-39
7-35	Response to statement, “Scientists don’t get as much fun out of life as other people do”: 2001	A7-40
7-36	Response to statement, “Scientists are apt to be odd and peculiar people”: 2001	A7-41
7-37	Response to statement, “Scientists have few other interests but their work”: 2001	A7-42
7-38	Response to statement, “Scientists are not likely to be very religious people”: 2001	A7-43
7-39	Attitude toward or interest in science career: 2001	A7-44
7-40	Response to statement, “Scientific work is dangerous”: 2001	A7-45
7-41	Access to the World Wide Web at home: 2001	A7-41
7-42	Leading source of information about current news events: 2001	A7-47
7-43	Leading source of information about science and technology: 2001	A7-48

7-44	Leading source of information about specific scientific issue: 2001	A7-49
7-45	Users of public information on an annual basis: 2001	A7-50
7-46	Viewers watching news magazines, public television, and science television shows: 2001	A7-51
7-47	Viewers watching television news: 2001	A7-52
7-48	Daily newspaper readers: 1979–2001	A7-53
7-49	Users of various sources of information: 2001	A7-54
7-50	Visitors of science or technology museums one or more times per year: 1983–2001	A7-55
7-51	Readers of science fiction books or magazines: 2001	A7-56
7-52	Viewers of Star Trek and X-Files: 2001	A7-57
7-53	Public assessment of astrology: 1979–2001	A7-58
7-54	Frequency of reading astrology reports, by selected characteristics: 1985–2001	A7-59
7-55	Belief in psychic powers or extrasensory perception, by selected characteristics: 2001	A7-61
7-56	Belief that unidentified flying objects are space vehicles from other civilizations: 2001	A7-62
7-57	Belief in lucky numbers, by selected characteristics: 1988–2001	A7-63
7-58	Belief in alternative medicine, by selected characteristics: 2001	A7-64
7-59	Public assessment of magnetic therapy, by selected characteristics: 2001	A7-65

Chapter 8. Significance of Information Technology

8-1	Moore's Law: 1971–2005	A8-1
8-2	Worldwide production of original content, stored digitally using standard compression methods: circa 1999	A8-2
8-3	Mobile phone penetration in OECD countries: 1990–99	A8-3
8-4	Internet hosts per 1,000 inhabitants in OECD countries	A8-4
8-5	Percentage of households with computer	A8-5
8-6	Percentage of households with Internet access	A8-6
8-7	Internet use for individuals age 3 and older	A8-7
